

# 3D Printing

*Explore 3D Print Operation and Design*

Explore the capabilities of 3D printing, operation and project design on a machine designed for in home use! This class is intended to open minds to the possibilities for 3D printing across STEAM fields in the future.

- The class will select a design and then, setup and print 1 or more small projects.
- then, each student will have a chance to design a simple project and submit it for printing.

*Note: Because of the slow operation of 3D printers they may need to stop by the learning center later the following week to pick up their printed project.*

**Saturday, February 10<sup>th</sup> 1:00 to 4:00pm**

**Only \$40/student for ages 9 to 14** \*Discount for groups of 3 or more.

(Seats are limited, reserve a seat **Today!**)
