

3D Printing

Explore 3D Print Operation and Design

**With
your
Kid!**

Explore the capabilities of 3D printing, operation and project design on a machine designed for in home use! **With your kid!** This class is intended to open minds to the possibilities for 3D printing across STEAM fields in the future.

- The class will select a design and then, setup and print 1 or more small projects.
- then, each student will have a chance to design a simple project and submit it for printing.

Note: Because of the slow operation of 3D printers they may need to stop by the learning center later the following week to pick up their printed project.

Saturday, Jun 29th 1:00 to 4:00pm

Only \$50/student for ages 9 to 14 *Discount for groups of 3 or more.
(Seats are limited, reserve a seat **Today!**)
